Note(1): Deduct 1.5" in width and height for rough-in can. All cans are 2.5" deep

Note (2): Letters, larger numerals and other styles can be custom made.

ABOUT OUR PRODUCTS

Construction

All of our fixtures are meticulously hand-crafted using solid copper to provide the finest, most durable outdoor lighting available. Some small parts such as loops, swivels and retaining screws are made of solid brass. No ferrous or aluminum metals are used anywhere in our products.

Finials - other than loops are available on special order.

Lamps

All Fixtures utilize 12 volt, energy efficient, quartz-halogen lamps that produce a bright white light accentuating plants and landscape features with brilliant and natural colors as if lit by a ray of sunshine. Long life 12v Xenon lamps are also available.

Lamp Sockets

We use universal ceramic sockets with silver plated phosphor-bronze contacts. They accept all JC, JCX, MR11, & MR 16 lamps from 5 to 50 watts.

Electrical Connections

A 3' pigtail, for connection to power source, is included with each path/area fixture. Hanging fixtures come with a 6' lead.

Mounting Stakes

Stakes are constructed from Sch.40 PVC and are 8" long. A below-grade mounting stake is furnished with all path/area fixtures. RC 1.5 and RC2 are shipped with 8" and 10" copper slake, respectively.

Warranty

All fixtures are warranted for two years.

OPTIONS

- Finishes**
- N** Natural Copper - Unfinished copper with no chemical treatment. Develops it's own natural patina with time.
 - V** Verdigris - A chemically treated process that creates a blue-green patina that forms naturally with years of exposure.
 - AB** Antique Brown - A chemically treated process that creates a rich dark brown patina.
 - NW** Natural Wash- A chemically treated process that creates a natural weathered look.
